Executive Discovery Synthesis & Priority Actions - Cami Kurtz (v1 Draft)

3-Page Executive Discovery Synthesis & Priority Actions Blueprint

1. EXECUTIVE DIAGNOSTIC EXECUTIVE SUMMARY

Kurtz Leadership Advisory conducted in-depth diagnostic discovery across C-suite leadership (CTO, VP Product, VP People, Director of Engineering, Head of Customer Success) at Apex Global Technologies to evaluate sprint predictability, roadmap governance, and manager retention.

Key Finding: 42% of engineering sprint capacity is currently diverted to ad-hoc customer emergencies, driving mid-tier manager burnout (82/100 score) and dragging Net Revenue Retention down from 124% to 102%.

2. CROSS-FUNCTIONAL FRICTION & IMPACT MATRIX

Diagnostic interviews identified three critical friction domains requiring immediate structural intervention:

Friction Domain	Impacted Departments	Quantified Business Loss	Severity
Unvetted Custom Promises	Sales vs Engineering	42% sprint diversion; $780k ARR churn	CRITICAL
Meeting Fragmentation	Frontline Managers	19.4 hrs/week in meetings; 28% turnover	HIGH
Onboarding Expectation Gap	Sales vs Customer Success	NRR down to 102%; onboarding delays	HIGH
Platform Dependency Gridlock	Engineering Squads	36-hr analytics outages; friction	MEDIUM

3. 6-WEEK MODULAR INTERVENTION BLUEPRINT

The proposed 6-week curriculum systematically addresses roadmap governance, meeting bloat, and management enablement:

- Week 1: Executive Alignment & Architectural Review Charter (Locking quarterly roadmaps).
- Week 2: Joint OKR Mapping & Capacity Ring-Fencing (30% maintenance / 70% features).
- Week 3: Asynchronous Operating Rhythms & 40% Meeting Calendar Purge.
- Week 4: Sales-to-Success Handshake & SOW Scoping Rubric.
- Week 5: Frontline Manager Delegation Mastery & Burnout Mitigation.
- Week 6: Long-Term Governance Council Launch & 90-Day Execution Scorecard.
