DockStream Yard Management - B2B Enterprise Sales Deck Companion & ROI Model (v1)

4-Page Enterprise Logistics Deck Companion & Terminal ROI Benchmark

1. THE ENTERPRISE TERMINAL CONGESTION CRISIS

Industrial logistics facilities lose an estimated $3.2 billion annually in carrier detention, trailer dwell waste, and manual yard management errors.

DockStream's autonomous yard orchestration engine eliminates gate bottlenecks, slashes driver dwell time by 62%, and delivers verifiable ROI within 60 days of deployment.

2. TERMINAL ROI & DETENTION SAVINGS BENCHMARK

Facility Scale	Daily Inbound Trucks	Baseline Dwell Time	DockStream Dwell Time	Annual Detention Saved
Small Distribution Hub (10-20 bays)	60 trucks / day	145 minutes	58 minutes	$148,000 / year
Mid-Size Regional Terminal (25-50 bays)	180 trucks / day	168 minutes	64 minutes	$442,000 / year
Enterprise Mega-Hub (60+ bays)	450 trucks / day	192 minutes	71 minutes	$1,180,000 / year
Multi-Site 3PL Network (5 Hubs)	1,200 trucks / day	174 minutes	66 minutes	$3,620,000 / year

3. PLATFORM CAPABILITY HIGHLIGHTS

- Mobile SMS Driver Check-In: Multilingual, zero app installation, sub-90 second gate processing.
- Dynamic Bay Assignment Engine: Automated dock door allocation based on real-time forklift crew availability.
- Yard Spotter Telematics: Digital move manifests dispatched directly to yard mule cab tablets.
- Enterprise ERP / TMS Connectors: Native webhooks for SAP, Oracle Transportation Management, and Manhattan WMS.

4. 14-DAY ZERO-DOWNTIME DEPLOYMENT GUARANTEE

- Day 1-3: Cloud tenant provisioning and digital terminal yard mapping.
- Day 4-7: TMS / WMS API connector configuration and dispatch workflow staging.
- Day 8-10: Guardhouse and yard spotter tablet orientation (two 30-minute shift briefings).
- Day 11-14: Pilot go-live with dedicated DockStream implementation engineer on-site.
